Twenty Cases Are Reported to Have Been Liscovered.

The Scabies itch, a very contagious and disagreeable disease, has made its appearance in the public schools of the city. Its origin is unexplained, but no less than twenty cases of the disease have been found. Dr. Whitney, in inspecting the schools, found seven cases of it at first, but since his last report Trainmen, and the of it at first, but since his last report begun with the Santa he had found thirteen more cases, two

of which are adults.

Clark and Morrisey here today en route to rom Topeka, where they with the Santa Fe officer instructions from the sent they are directing the authorities believe that they will higher wages, and the the authorities believe that they will be able to completely stamp it out in a short time. It takes the disease an indefinite time to run its course when once it starts and every effort will be made to check it before it gets a good start. Investigations have failed to reveal how the disease was introduced in the schools.
